

SOURAV CHOWDHURY

Full Stack Developer (Next.js · Node.js · PostgreSQL)

Kolkata, West Bengal, India | +91-6294660381 | souravchowdhury0203@gmail.com

Portfolio: sourav.is-a.dev | GitHub: github.com/sourav81R | LinkedIn: linkedin.com/in/souravchowdhury-2003r

ABOUT ME

Full Stack Developer at Oneisok Digital Solution and a Computer Science & Engineering graduate (2026), building web applications from backend to frontend. I work with APIs, databases, third-party integrations, and deployment to turn ideas into reliable products. Currently engineering Voteniti, an election management platform that models the Indian election hierarchy from state level down to individual booths, with area-scoped RBAC and an on-demand data layer that keeps hundreds of thousands of records queryable on a small database tier. Focused on data modelling, permission boundaries, and query cost — the parts that decide whether a product holds up in real use.

EXPERIENCE

Full Stack Developer | Oneisok Digital Solution, Kolkata (Onsite) | May 2026 – Present

- Engineer **Voteniti**, a full-stack Election Management System covering MP, MLA, Municipal, and Panchayat election hierarchies across India
- Modelled the national election hierarchy — 543 Lok Sabha constituencies down to individual booths — as an authoritative Area Master seeded from ECI and LGD government datasets
- Designed an on-demand data layer serving ~255k Gram Panchayats and ~97k urban Wards from bundled NDJSON files, materializing rows into PostgreSQL only on first use to stay within a 500 MB database tier
- Built enterprise RBAC with area- and election-scoped role assignments, recursive server-side subtree guards, and smart-delete approval workflows with full audit logging
- Cut MP hierarchy load time from minutes to seconds by replacing thousands of serial per-row queries with bulk subtree materialization
- Authored and shipped 85+ raw SQL migrations against a Supabase-hosted PostgreSQL database
- Rebuilt **oneisok.co** on Next.js 14 with a role-based admin panel, self-service influencer portal, and MongoDB Atlas persistence, so staff publish content without a deploy

Full Stack Developer Intern | Euphoria GenX | Aug 2025 – Feb 2026

- Completed a structured Skill Development & Internship Program focused on full-stack web development
- Built **Foodooza**, a real-time food delivery web application, with end-to-end frontend and backend functionality
- Implemented real-time features, authentication flows, and responsive UI components across the stack
- Gained hands-on experience in application architecture, debugging, and deployment workflows

Web Developer Intern | Pinnacle Labs Pvt. Ltd. | Oct 2024 – Nov 2024

- Built responsive UI components using JavaScript and React
- Integrated REST APIs for smooth client-server communication
- Fixed bugs and improved application performance and reliability
- Used Git and followed structured SDLC practices

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript (ES6+), Java, C, SQL
- Frontend:** React.js, Next.js (App Router), Three.js, React Native, Tailwind CSS, TanStack Query, HTML5, CSS3, SEO
- Backend & APIs:** Node.js, Express.js, Nest.js, REST APIs, RBAC & Authorization, JWT, Zod validation
- Databases:** PostgreSQL, Supabase, MongoDB, Firestore, SQL migrations, schema design, query optimization
- Cloud & Infrastructure:** AWS, Cloudflare R2, Vercel, Render, Firebase, object storage, deployment & hosting
- Tools:** Git, GitHub, Postman, VS Code, Vite, Expo
- AI Tools:** Claude, ChatGPT, Gemini, GitHub Copilot, OpenAI API, prompt engineering

PROJECTS

Voteniti – Election Management System | Full Stack Developer, Oneisok Digital Solution

Next.js 16, React 19, TypeScript, Node.js, Express, PostgreSQL, TanStack Query, Zod, JWT

- Production platform running MP, MLA, Municipal, and Panchayat election operations across India
- Hierarchy-driven architecture where the org chart is the team: scoped president roles manage only their own subtree, enforced server-side
- Live: <https://voteniti.in>

Oneisok – Company Website & Admin Panel | Full Stack Developer, Oneisok Digital Solution

Next.js 14, TypeScript, Tailwind CSS, MongoDB Atlas, Firebase Auth

- Rebuilt the company website with a built-in role-based admin panel for Super Admin, HR, and office staff
- Added a self-service influencer portal and migrated production data from Firestore to MongoDB Atlas
- Live: <https://www.oneisok.co>

ResumeIQ – AI Resume Analyzer & ATS Optimizer | Full Stack Developer

Next.js 14, TypeScript, Tailwind CSS, Firebase, OpenAI API, Zod, PDF/DOCX parsing, Vercel

- Production-ready SaaS app with Google Auth, protected routes, secure session cookies, and Firestore data modeling
- AI-powered resume analysis with a weighted ATS scoring algorithm, keyword match %, skill gap detection, and PDF report export
- Live: <https://resume-iq-coral.vercel.app>

Foodooza – Real-Time Food Delivery App | Full Stack Developer

React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT Authentication, Tailwind CSS, Render

- Real-time ordering journey from catalog through checkout and order tracking
- Implemented authentication, session handling, and transactional database consistency
- Live: <https://food-app-frontend-lh2k.onrender.com/>

EDUCATION

Bachelor of Technology, Computer Science & Engineering (MAKAUT)

Greater Kolkata College of Engineering & Management (2022 – 2026) | CGPA: 7.75

Higher Secondary (WBCHSE)

Shyamnagar Sri Ramkrishna Vidyamandir (2019 – 2021) | Percentage: 83

Secondary (WBBSE)

Shyamnagar Sri Ramkrishna Vidyamandir (2018 – 2019) | Percentage: 70.14

CERTIFICATIONS

- AWS Academy Data Engineering | AWS Academy
- Full-Stack (MERN) Training & Internship | Euphoria GenX
- AI-ML Virtual Internship | EduSkills
- Appreciation of Digital Literacy | Capgemini
